

Air-Matt has worked closely with Safe Patient Handling clinicians to deliver a reusable matt with unique design features and exceptional value, making lateral patient transfers gentle and safe for caregivers and patients.

Air-Matt Reusable Features

INFECTION CONTROL HANDLES

Our coated latex-free handles are exclusive to Air-Matt and improve infection control performance over standard webbing materials.

EASY CLEANING

Air-Matt Reusable matts are wiped down with disinfecting wipes and standard solutions and can be both machine-laundered and dried at standard hospital laundry temperatures.

DURABLE & STRONG

Our all-stitched construction and design results in years of use and accommodates patients up to 1,200 lbs.

LOSS PREVENTION

Our highly visible matt coloring reduces loss by making our Reusable Matts more recognizable to staff as a non-disposable item. Clear stand-out labeling further reduces loss of reusable matts. RFID-ready.

Latex-free. Radiolucent.

Benefits of the Air-Matt Patient Transfer System

- ✔ Offers ultimate comfort and security during all patient repositioning and transfers.
- ✔ Allows the patient to be covered during movement—affording dignity and privacy.
- ✔ Helps the caregiver to provide personal, courteous, high-quality care.
- ✔ Prevents patient and caregiver injuries.
- ✔ Mats may be used in all hospital procedure departments—including MRI.
- ✔ Patients can be left on the mat while in bed and during medical procedures.
- ✔ Simple to operate with minimal In-Service training requirements.
